

Over the Counter

- Ñ **Seresto** is an over-the-counter flea and tick collar that is applied and left on, preventing fleas and ticks for 8 months. The collar repels and kills ticks, and it also kills fleas. Seresto comes as a cat collar, small dog collar, and large dog collar. Collars are made with special materials that help them last a full 8 months, but will break away should your pet get caught on anything.
- Ñ **Frontline Tritak** is a new medication by Merial, similar to Frontline Plus. It is an over-the-counter topical flea and tick prevention. It is a solution that you apply once a month, it is available on our online pharmacy as a 3-month or 6-month supply. Tritak is available for both cats and dogs.

Flea or Heartworm Preventions

- **Heartgard** is a prescription oral heartworm prevention. It also deworms for roundworms, hookworms, and whipworms – three types of intestinal parasites that have the potential to be transferred to humans. It is a chew given once per month, and is available here in a 6-month supply. Heartgard is labeled for use in dogs and cats. We require an annual exam and heartworm test in order to prescribe this medication
- **Comfortis** is a prescription oral flea prevention given once a month with a small meal. Each tablet prevents fleas for 1 month, and is available here in a 6-month supply. Comfortis is labeled for use in cats and dogs. Since this is a prescription medication, an annual exam is required for us to fill this medication for you.
- **Cheristin** is an over-the-counter flea prevention for **cats only**. It is applied once a month topically to the back of the neck and prevents fleas for 1 month. Cheristin is available through us or on our online pharmacy as single doses or 6-month supplies.
- **Bravecto** is a prescription oral flea and tick prevention. It is given orally every 12 weeks with a meal. Bravecto is available through our online pharmacy as a single dose.
